### **What is a Ceiling Lift?**

A ceiling lift is an essential piece of medical equipment designed to safely transfer individuals with mobility challenges from one place to another—such as from a bed to a wheelchair or to a commode chair. Mounted to the ceiling, it reduces the risk of injury for both the individual and the caregiver by providing stable and efficient support.

### **Why We Need New Ceiling Lifts?**

Our current ceiling lifts are aging and in need of replacement. Upgrading to new models will significantly enhance the safety, comfort, and dignity of those in our care. New lifts are more reliable, quieter, and easier to use, making a positive impact on both residents and staff. By investing in this equipment, we are investing in quality of life.

### **How You Can Help**

We invite you to support this important initiative. Every contribution brings us closer to our goal of improved care and safety.

**To donate, please contact Sara at (807) 868-2442 ext. 5133.**

**You'll receive a tax receipt for making a donation.**
